! Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 15 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- https://cdn.syndication.twimg.com/widgets/timelines/676420507814727680?&lang=nl&callback=twitterFetcher.callback&suppress_response_codes=true&rnd=0.19426893815398216 (5 minutes)
- <https://maps.googleapis.com/maps/api/js?ver=4.6.2> (30 minutes)
- <https://ssl.google-analytics.com/ga.js> (2 hours)

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 2.5KiB (30% reduction).

- Minifying <https://www.bureaupro.nl/wp-content/themes/bridge/css/linea-icons/style.css?ver=4.6.2> could save 2.5KiB (30% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 1.1KiB (66% reduction).

- Minifying <https://www.bureaupro.nl/wp-content/themes/bridge/js/jquery.stretch.js?ver=4.6.2> could save 1.1KiB (66% reduction) after compression.
